

OUR APPROACH

Typical telecom costs

Your business telecoms will cost you more if you are using multiple suppliers or failing to use a fully independent provider.

New Solutions in Technology Costs

Using the savings we make by consolidating your existing services, we can supply a brand new 'feature rich' phone system, often for little or no extra cost.

Our Approach

Consolidating your costs, Improving your Telecoms. It's so simple...

Having multiple bills from multiple providers for multiple services can be an operational nightmare. At Solutions in Technology we provide a complete, comprehensive review of your existing telecoms expenditure.

We follow a simple process which starts with an analysis of your current costs followed by a detailed proposal that identifies saving opportunities. You can benefit from substantial savings on line rental, competitive call charges, maintenance, broadband and mobile packages all delivered to you on our 'one bill solution'.

Our buying power means that we can pass on competitive wholesale rates and can adapt our pricing to meet clients' needs. Our dedicated team will help you take control of your expenditure, reduce administration time and simplify your telecoms management.

We help clients to enjoy savings that would be difficult to identify in house. We've helped thousands of businesses across the UK to their telecoms waste. It's so simple... One provider, one bill, one brand new telephone system.

Free Telecoms Spend Analysis. Get in touch.

Talk to us today to find out how much your potential saving could be. Don't feel like calling up? Simply email us a copy of your latest bills for analysis. We'll perform a free analysis and let you know how much you could save or how you could be getting more from your current spend.
